

HEAT RESISTING MATT BLACK AND ALUMINIUM SILVER

Description

A heat resisting paint which when cured, provides a durable finish which offers protection against weather, resistance to heat, water and dilute acids.

Application

Ensure the surface to be painted is clean and dry and remove any loose rust or flaking paint. If necessary, clean with panel wipe. Apply 1 – 2 light coats, allowing 1 hour between coats.

Drying time

Within 1 hour. Recoatable after 1 -2 hours. Can be handled after 2 hours

Heat Resistance

The paint will be touch dry within 1 hour but full resistance is achieved after running the engine for about 1 hour. After this, the paint will withstand temperatures of up to 300 degrees C.

As with all paints, care should be taken to wear appropriate breathing equipment and have sufficient ventilation.
